DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Species I: Figures 1-5 (claims 1-11, 13, 14 and 21-26 in Paper No. 9 and 10 is acknowledged. Claims 6, 11 and 26 direct to Species III. Therefore, Claims 6, 11 and 26 are drawn to an invention nonelected without traverse. Accordingly, claims 6, 11, 12, 15-20 and 26-27 are withdrawn from consideration at this point.

Information Disclosure Statement

2. The information disclosure statement (IDS) submitted on 12/10/2001 has been considered and placed in the application.

Drawings

3. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference characters "38" and "70" have both been used to designate the compression element or engaging element. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

4. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference characters "68" and "74" have both been used to designate the engageable element or tab member. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

6. Claims 5 and 8-10 and 14 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The specification does not support "at least one tab member, projecting from the outer surface of the filter device inwardly therefrom". Instead the specification disclose the tab members projecting from the inner surface of the filter device and projecting inwardly therefrom.

7. Claims 5, 8-10 and 14 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for the tab members projecting from the inner surface of the filter device and projecting inwardly therefrom, does not reasonably provide enablement for "at least one tab member, projecting from the outer surface of the filter device inwardly therefrom". The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make the invention commensurate in scope with these claims. The claims limitations should be "the tab members projecting from the inner surface of the filter device and projecting inwardly therefrom".

Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

9. Claims 1-5, 7-10, 13 and 21-25 are rejected under 35 U.S.C. 102(b) as being anticipated by Lefebvre (5,649,953).

Lefebvre discloses a filter system and method for capturing embolic material wherein the filter system comprising:

- A guidewire;
- A filter device comprising a compressing element having an engageable element having at least one tab member projecting from the outer surface (15) of the filter device; an engaging element (9) having an opening for receiving the at least one tab member;
- A delivery enabling element including an inner tube (3) and an outer tube (8) bearing against the compressing element (9),
- A stop member (6)
- A normally-compressed member (5).
